GMT bacteria in agrobiolgy crop

productivity pdf - Rhizobia

are bacteria that fix nitrogen

(diazotrophs) after

becoming established inside

root nodules of legumes

().To express genes for

nitrogen fixation, rhizobia

require a plant host; they

cannot independently fix

nitrogen. In general, they

are Gram-negative, motile,

non-sporulating rods. Fri,

GMT Rhizobia - Wikipedia

- NPK fertilizers are

three-component fertilizers

providing nitrogen,

phosphorus, and potassium.

NPK rating is a rating

system describing the

amount of nitrogen,

phosphorus, and potassium

in a fertilizer. NPK ratings

consist of three numbers

separated by dashes (e.g.,

10-10-10 or 16-4-8)

describing the chemical

content of fertilizers.
